

UNIVERSITY OF
GEORGIA

Interactive Partner!

The University of Georgia is a flagship public national Sea-grant, Space-grant, Sun-grant, and Land-grant research university with its main campus in Athens, Georgia. Founded in 1785, it is one of the oldest public universities in the United States. In collaboration with Citizen Science HD, UGA has worked hand-in-hand with our TMS STEM Cohort to research, develop and roll-out a mosquito monitoring and control program. Entitled B.I.T.E. (Biological Investigations with Technology & Engineering), Cohort students, under the guidance of Guha Dharmarajan, an Assistant Research Science at UGA's Savannah River Ecology Laboratory, engaged in the design and construction of mosquito traps as well as the collection and analysis of subsequent data. Results were presented at an event sponsored with one of our Advocate Partners, Northrup Grumman.
